Education

Vellore Institute of Technology

Sept 2022 – Sept 2026

B.Tech in Computer Science and Engineering | CGPA: 8.46

Technical Skills

Languages: C++, JavaScript (ES6+), HTML, CSS
Frameworks & Libraries: React.js, Node.js, Express.js, Tailwind CSS
Databases & Platforms: MongoDB, Firebase Firestore
Tools: Git, GitHub, Postman, Vercel, n8n, ChatGPT, Claude, Gemini

Work Experience

NoobSync Innovations

Jun 2026 – Present

AI Automation Developer & Growth Intern

Remote

- Building a client-facing WhatsApp Business automation using Meta Cloud API and self-hosted n8n to auto-categorize inquiries, send real-time responses, and integrate CRM workflows in collaboration with a cross-functional engineering team
- Created and executed 20+ organic social media campaigns, increasing LinkedIn followers by 2,757% (7 to 200) and driving 2,000+ Instagram content views within one week
- Researched, evaluated, and implemented automation tools and workflows from scratch, delivering a production-ready solution within the scheduled timeline

Twvios Technologies Pvt. Ltd.

Jul 2025 – Sep 2025

Technical Intern

Remote

- Developed 10+ production-ready UI screens using Next.js and Tailwind CSS by translating Figma designs into fully responsive components, achieving 95% pixel accuracy against design specifications
- Reduced data-fetching latency by 30% and eliminated 80% of cumulative layout shifts by integrating REST APIs with SWR for client-side caching and server-state synchronization
- Built a reusable component library standardizing frontend architecture across the codebase, cutting average sprint delivery time by 30% on subsequent product releases

Edunet Foundation X EY GDS

Dec 2024 – Jan 2025

Web Development Intern

Remote

- Selected for a competitive internship co-organized with EY GDS; sole developer on a full-stack MERN web application delivered end-to-end within a 6-week timeline
- Architected a MERN-stack news aggregator serving 5+ content categories via NewsAPI with a Node.js/Express proxy layer securing API credentials server-side
- Delivered a responsive React frontend with real-time article rendering across 3 screen breakpoints; validated all 10+ API endpoints using Postman

Projects

Personal Portfolio Website | [Live](#) | [GitHub](#) | React.js, JavaScript, Tailwind CSS, Canvas API

Apr 2026

- Developed a fully responsive personal portfolio website using React to showcase projects, technical skills, experience, and UI/UX designs created in Figma across mobile, tablet, and desktop devices
- Engineered custom React hooks including `useTyped`, `useInView`, and `useCountUp`; implemented scroll-triggered animations using the Intersection Observer API without relying on external animation libraries
- Built an interactive Canvas API particle system with real-time mouse interaction supporting an 80-particle simulation; refactored the application into 11 modular components with a scalable hooks-based architecture following React best practices

Scribiq | [GitHub](#) | MongoDB, Express.js, React.js, Node.js, Tailwind CSS, Upstash Redis, Gemini API

Dec 2025

- Developed a full-stack AI-assisted note-taking app with CRUD operations via RESTful endpoints; integrated Gemini 2.0 Flash API for real-time suggestions, reducing note drafting time by 40%
- Enforced API rate limits using Upstash Redis to prevent abuse; built consistent UI across 10+ reusable Tailwind CSS + DaisyUI components

CodeWise | [GitHub](#) | MongoDB, Express.js, React.js, Node.js, Tailwind CSS, Gemini API

Dec 2024

- Launched an AI-powered code review tool that analyzes submissions for bugs and optimization opportunities, cutting manual review time by 35% in internal testing
- Authored 50+ structured prompt templates to guide LLM output, achieving 99% accuracy in identifying code quality issues across a test set of 100+ code samples
- Designed RESTful API endpoints using Node.js and Express to accept code submissions, trigger Gemini AI evaluation, and return structured feedback with bug locations and fix recommendations

Achievement

TCS CodeVita Season 12: Ranked 4386 (top 1.3%) among 537,000+ global participants (Round 2 qualifier), demonstrating exceptional problem-solving skills and algorithmic proficiency using C++ [Certificate]
