Education

Vellore Institute of Technology

B.Tech in Computer Science and Engineering - 8.46 CGPA

Sept 2026

Bhopal, India

City Montessori School

Class XII - CISCE Board - 93.5%

Jun 2021

Lucknow, India

Technical Skills

C++, JavaScript, Python, SQL, React.js, Node.js, Express.js, MongoDB, Artificial Intelligence, Machine Learning, HTML/CSS, Git, Postman.

Projects

Crop Disease Detection Model | [GitHub](#) | *Python, TensorFlow, Keras*

Dec 2025

- Engineered a deep learning image classification model to identify 38 crop diseases from leaf images with 92.43% validation accuracy
- Leveraged transfer learning by fine-tuning a pre-trained MobileNet architecture on the PlantVillage dataset consisting of 54,000+ labeled leaf images
- Implemented extensive data augmentation using Keras (ImageDataGenerator) including rotation, zoom, shear, and flips to improve model robustness

Scribiq | [GitHub](#) | *MongoDB, Express.js, React.js, Node.js, Tailwind CSS, Upstash Redis, Gemini API*

Dec 2025

- Developed a full-stack AI-assisted note-taking app with CRUD operations via RESTful endpoints; integrated Gemini 2.0 Flash API for real-time suggestions, reducing note drafting time by 40%
- Enforced API rate limits using Upstash Redis to prevent abuse; built consistent UI across 10+ reusable Tailwind CSS + DaisyUI components

PDF Intelligence System - RAG Chatbot | *Python, LangChain, OpenAI GPT-3.5, FAISS, Streamlit*

July 2025

- Built an end-to-end RAG pipeline enabling natural language querying over multiple PDFs simultaneously, using FAISS vector store and HuggingFace `all-MiniLM-L6-v2` embeddings for semantic retrieval
- Integrated OpenAI GPT-3.5 Turbo with conversation buffer memory to deliver context-aware, multi-turn responses grounded strictly in document content, eliminating hallucinations
- Designed an intuitive Streamlit interface allowing non-technical users to interact with complex documents via natural language queries

CodeWise | [GitHub](#) | *React.js, Node.js, Express.js, Gemini API*

Jun 2025

- Developed an AI-powered code review application that automates bug detection and optimizations, reducing manual review time by 35% in testing
- Built a complete full-stack application that delivers specific, actionable feedback to developers, streamlining the code quality assurance process

Work Experience

Twvios Technologies Pvt. Ltd.

Jul 2025 – Sep 2025

Technical Intern

Remote

- Engineered 10+ dynamic interfaces using Next.js and React.js, translating Figma designs into pixel-perfect code with 95% design fidelity
- Resolved critical responsiveness issues across legacy web pages by implementing mobile-first styling and Tailwind CSS breakpoints, ensuring seamless rendering on mobile, tablet, and desktop devices
- Integrated 5+ REST APIs using SWR for efficient server-state management, reducing data fetching latency by 30% and eliminating layout shifts (CLS) by 80%
- Standardized the frontend architecture by building a library of reusable functional components, which accelerated the development lifecycle of future sprints by 30%

Achievement

TCS CodeVita Season 12: Ranked 4386 (top 1.3%) among 537,000+ global participants (Round 2 qualifier), demonstrating exceptional problem-solving skills and algorithmic proficiency using C++ [Certificate]
